FORM2FINISH

Metro Vancouver, BC

GIVE US THE PROBLEM.

One accountable team, form to finish. Concrete and finish work for engineers and strata managers.

WHAT WE GET CALLED FOR

Walls on tight sites

Forming, rebar and pours for walls, planters and stepped footings, on slopes and between existing buildings.

Slabs and patches

Saw-cut, patch and trowel finish that sits flush with the floor around it.

Driveways, walkways, stairs

Dig out, form, pour and finish, right up against the building.

Foundations and footings

Layout, forms, rebar and pump day, from a house to a 123-space childcare centre.

Work around piles

Forming, rebar and pours around drilled piles.

Final finish

Trowel, float, patch, polished and broom.

FORM TO FINISH, CLEARLY NAMED

Layout and forming	Rebar	Pour	Final finish
Boss & Friends	Boss & Friends	Boss & Friends	Form2Finish

Boss & Friends Construction Ltd. carries out forming, rebar and pours. Form2Finish does the final finish and is your one point of contact.

West Kelowna	Waterfront wall pour by boom pump	Boss & Friends
New Westminster	Slab and pit patches: saw-cut, poured, trowel finished	Form2Finish
Surrey	Planter and sonotube column forms on a slope	Boss & Friends

HOW WE WORK

1

See the problem first

The site, the drawings, and what the engineer is actually trying to solve.

2

Options in dollars

What each fix costs now, and what waiting costs later.

3

One scope, one team

No hand-offs to chase. One accountable contact from form to finish.

4

A record you can file

Dated photos of every stage, by job, so nothing gets buried without proof.

BEHIND IT

Six years on the tools. Drywall and renovation across Ontario, from washrooms and basements to a large estate home, then concrete in Vancouver, starting on the pump. A finisher who has poured knows what a bad pour costs. That's why we think about the hand-offs before they happen.

OUTSIDE METRO VANCOUVER

We can refer independent, trusted teams in Windsor, Ontario and Halifax, Nova Scotia.
